ViRaj Engineers

Creativity is transformed to reality with engineering skills and technology

About Us

√iRaj endeavors in providing technical support services in the field of Structural engineering, geotechnical engineering, environmental engineering and special structures like reinforced soils structures, soil nailing, gabion retaining walls etc. The organization also provides project management support and tools, during project bidding, project planning and monitoring, contract management and quality assurance services for successful completion of project.

√iRaj has tie ups with industry experts on advisory roles for necessary support required in a given specific sector. The organisation involves in the project right from the planning stage and partners with the client till the completion of the project with the execution team to ensure timely completion.

√iRaj adds value by assisting in setting up a project management unit to manage complete project portfolio from a central location. Such asset helps to identify & plan resources better and handle contractual aspects with focus on project progress more effectively.

Mission

Creativity is transformed to reality with engineering skills and technology. ViRaj Engineers endeavor to be a trusted partner of the client to ensure successful completion of the project through innovation, precision and using latest technologies that in turn will constantly enhance the quality of project. This innovation in technology and its application facilitates the effort required for creation. Technology will always require some 'Kaizen' factor in order to enrich the results we obtain.

Vision

To be known as leading service provider in the field of civil engineering with high quality delivery respecting the essence of time.

Motto

Towards engineering excellence.

Services

What we offer ?

- *Technical Consultancy.
- *Engineered Solutions & Procurement.
- *Project Management & Consultancy.
- *Construction Services.

Services

Technical Consultancy

We provide end to end services in technical consultation that ideally has to begin with detailed site investigation activity followed by site visit to sketch the problem and work out the probable solutions. The scope will include suggesting the most suitable solution to a given problem in the form of techno-commercial proposal. ViRaj can assist the clients in preparing Detailed Project report, tender specifications, budgetary estimation and quality assurance plan for the given project.

Services

Engineered Solutions & Procurement

The support and services include detailed engineering works in terms of detailed design of solutions with advanced software that are validated through manual calculations. The designs shall be confirming to latest codal provisions (national and international). Engineering drawings of solutions shall be part of the services offered.

Services

Project Management & Consultancy.

We provide expert services in terms of project planning, control and other project services for construction and Infrastructure sector. The objective of this service sector is to help the client plan, monitor and control the projects and effects of change, effectively and efficiently. We can involve ourselves in this sector with the client from the project inception stage or during the project execution stage also where changes are happening and client needs project management support.

Services

Construction Services

ViRaj is professionally equipped to provide construction services in the Industrial sector and special sectors. With expert in house project management tools, strong technical support and design services, the construction service sector of Viraj Engineers has a strong foundation to deliver quality structures within the stipulated time.
